Getting Started with the Configuration .............................................................................................12
Welcome

Thank you for choosing Yeastar S20 IP PBX. Yeastar S20 is a stand-alone telephone system offering an unrivalled range of features to small business with less than 20 users. It supports 10 concurrent calls and various combinations of telephony ports including FXS, PSTN, ISDN BRI, and GSM/3G.

This guide describes how to install the S20 and how to log in the web GUI to configure the system. Once you complete the installation, refer to the Yeastar S-Series Administrator Guide for instructions on how to perform configurations on the system.

Related Documents

This Installation Guide only explains the installation of Yeastar S20 IPPBX. For more functionality and advanced settings, please refer to the relative documents as below:

## Port Description

<table>
<thead>
<tr>
<th>Ports</th>
<th>Description</th>
</tr>
</thead>
</table>
| RJ11 Port | **FXO port** (red light): for the connection of PSTN lines or FXS ports of traditional PBX.  
**FXS port** (green light): for the connection of analog phones.  
**BRI port** (orange light): for the connection of ISDN BRI lines.  
**Note:** the sequence number of the ports corresponds to that of the Indicator lights in the front panel. (i.e. the LED lights in the front indicate the connection status of the corresponding ports at the front panel.) |
| ANT     | Rotate the antenna into the Antenna Socket.                                                                                                     |
| TF Slot | Insert TF card.                                                                                                                                      |
Yeastar S20 provides two 10/100M adaptive RJ45 Ethernet ports. There are 3 Ethernet modes for the system. The default mode is “Single”.

- **Single**: LAN port interface will be used for uplink connection. WAN port is disabled.
- **Bridge**: LAN port interface will be used for uplink connection. WAN port interface will be used as bridge for PC connection.
- **Dual**: both ports can be used for uplink connection.

Installation

This chapter shows you how to install Yeastar S20 IP phone system.

Safety Disclaimers and Installation Warnings

To avoid unexpected accident, personal injury or device damage, please read the safety disclaimers and installation warnings.

Power
• Use only the power adapter provided with the IP PBX.
• Keep the power off during the installation.
• Make sure that the supply voltage matches the specifications indicated on the back panel of the device.
• To avoid the electric accident, do not open or remove the cover of IP PBX when it is working as well as off the power.
• Before cleaning the device, cut off the power supply.

Environment
Install the Yeastar S20 IP PBX in a location that is clean, free from vibration, electric shock, and temperature/humidity extremes. The operating temperature should be kept below 104°F (40°C).

Module Installation

Yeastar S20 supports installing up to 2 modules. The optional modules are as below:
• S2 Module
• O2 Module
• B2 Module
• SO Module
• GSM Module
• 3G Module

NOTE
Before installing the module, please check if the module is clean and intact.
STEP 1  Loosen the screws on the bottom of the device and remove the upper cover.

STEP 2  Insert the module to the Module Slot.

STEP 3  Insert a SIM card on the GSM/3G module following the instructions. Skip this step if no GSM/3G module installed.
STEP 4  Close the cover and fix the screws.

STEP 5  Rotate the antenna into the Antenna Socket. Skip this step if no GSM/3G module installed.
**Desktop Installation**

**WARNING**
- Please set 5~10cm gaps around the device for air circulation.
- Please avoid any heavy thing placed on the device.

**STEP 1** Place the IP PBX on a steady platform.

**STEP 2** Remove the adhesive backing paper from the rubber feet.

**STEP 3** Turn over the device and attach the supplied rubber feet to the recessed areas on the bottom at each corner of the device.
Connecting the Equipment

STEP 1  Connect one end of a network cable to the LAN port of Yeastar S20, and the other end to any port of your company’s LAN switch/router.

STEP 2  Plug the provided power adapter into the power jack on S20 and the other end to a standard electrical wall socket. Wait for the system to boot up till the SYSTEM LED starts to blink.

STEP 3  Connect the telephony line to the RJ11 port of the IP PBX.

<table>
<thead>
<tr>
<th>RJ11 Port</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>FXS</td>
<td>Connect one end of a RJ11 phone cable to the port. Connect the other end to the analog phone or fax machine.</td>
</tr>
<tr>
<td>FXO</td>
<td>Connect an RJ11 cable to the FXO port. Connect the other end of the cable to a PSTN line.</td>
</tr>
<tr>
<td>BRI</td>
<td>Connect the cable provided by the ISDN BRI provider to the BRI port. Connect the other end of the cable to the ISDN provider equipment.</td>
</tr>
</tbody>
</table>

**NOTE**
Connect BRI/PSTN/analog phone/fax machine to the corresponding port based on the color of port indicator.
Getting Started with the Configuration

Yeastar S20 IP Phone System provides web-based configuration interface for administrator. The administrator can manage the device by logging in the Web interface.

- **Access path:** https://192.168.5.150:8088
- **User Name:** admin
- **Password:** password

**STEP 1** Connect your PC to the same network as Yeastar S20.

**STEP 2** Start the browser on PC. In the address bar, enter the IP address, click “Enter” key and then you can see the web GUI login page shows as below.

![Login Page](image)

**STEP 3** For the detailed configurations of extensions, trunks and other system settings, please refer to the manual *Yeastar S-Series Administrator Manual*.

**NOTE**
After saving the changes, remember to click the “Apply” button at the top-right corner to make the changes take effect.
